## **DETAILED ACTION**

### ***Priority***

The current status of all nonprovisional parent applications referenced should be updated at page 1 of the specification.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 40, 45, 46, and 52-55 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 40 is vague since a distal region has not been recited in claim 36. Claims 45 and 46 are vague since a distal region has not been recited in claim 41. Claim 52 is vague since the proximal end of each electrode is positively connected to a monitoring apparatus that has not been positively claimed.

### ***Double Patenting***

Applicant is advised that should claim 45 be found allowable, claim 46 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

### ***Claim Objections***

Claims 1 and 41 are objected to because of the following informalities: claim 1, line 14 and claim 41, lines 4 and 19 set forth "he" in lieu of --the--. Appropriate correction is required.

***Allowable Subject Matter***

Claims 1-39, 41-44, 47-51, and 56-59 are allowed.

Claims 40, 45, and 52-55 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
